<input type="checkbox"/>	Front Elevation from across the street as a "Before" pic. Stand next to a landmark.
<input type="checkbox"/>	Dents, if any, on mailbox.
** Find the gate to the backyard and start on the opposite side elevation. ** Mark damage to the elevation with chalk, then take the following pics.	
<input type="checkbox"/>	Wide view of entire elevation.
** Repeat the medium and close up shots below for each additional storm damaged item on the elevation, ie if more than 1 window. ** Items should include 1 dent per downspout/extension, 1 chip per window or 1 rip per screen, 1 dent per aluminum wrap, 3 paint chips per elevation or 1 per trim piece, and 6 holes per Square for siding. ** No need to mark more damage or take more pics. Aim for efficiency.	
<input type="checkbox"/>	Medium shot of damaged downspout that includes an additional item for location reference.
<input type="checkbox"/>	Close up shot of damage to the item. # of Items:
<input type="checkbox"/>	Medium shot of damaged window frame that includes an additional item for location reference.
<input type="checkbox"/>	Close up shot of damage to the item. # of Items:
<input type="checkbox"/>	Medium shot of damaged window beading that includes an additional item for location reference.
